DETAILED ACTION

Claims 1-50 are pending.

Restriction Requirement

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-13 and 16-38 and 41-49 drawn to a cell population cultured ex-vivo in a culture medium, wherein said cells are non-differentiated, non-committed stem cells, classified in Class 435, subclasses 325, 375, 405.
 - II. Claims 1-8, 10, 14, 16 –33, 35, and 39, 41-49 drawn to a cell population cultured ex-vivo in a culture medium, wherein said cells are committed progenitor cells, classified in Class 435, subclasses 325, 375, 405.
 - III. Claims 1-6, 8, 15-31, 33, 40-49 drawn to a cell population cultured ex-vivo in a culture medium, wherein said cells are committed progenitor cells and non-differentiated, non-committed stem cells , classified in Class 435, subclasses 325, 375, 405.
 - IV. Claims 50 drawn to a cell population cultured ex-vivo in a culture medium, wherein said cells increased intracellular copper content, classified in Class 435, subclasses 325, 375, 405.
3. Groups I - IV are different products. A cell population recited in each group differ with respect to their structures, physiology and physicochemical properties; therefore each product is patentably distinct.
4. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Moreover, a prior art search also requires a literature

Art Unit: 1644

search. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

Species Election

5. Applicant is further required under 35 USC 121 (1) to elect a single disclosed species to which the claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added.

A. If Groups I -III is elected, applicant is required to elect : a specific source of cells, recited in claims 8 and 33.

These species are distinct because their structure, physicochemical properties and mode of action are different. The examination of species would require different searches in the scientific literature.

In addition,

B. If Groups I -III is elected, applicant is further required to elect : (i) a specific seeded cells selected from the group recited in claims 16 and 41; (ii) specific transition metal chelator selected from the group recited in claims 18 and 43; (iii) specific early acting cytokine selected from the group recited in claims 21 and 46 and (iv) specific late acting cytokine selected from the group recited in claims 23 and 48 .

These species are distinct because their structure, physicochemical properties and mode of action are different. The examination of species would require different searches in the scientific literature.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Art Unit: 1644

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michail Belyavskiy whose telephone number is (703) 308-4232. The examiner can normally be reached Monday through Friday from 9:00 AM to 5:30 PM. A message may be left on the examiner's voice mail service.
